DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7, line 1 is indefinite with respect to the claim language "may be" because it is unclear how the object identification is defined. Appropriate correction, such as changing "may be" to "is", is required.

Claim 7, line 2 is indefinite with respect to the terms "<layer identifier><object identifier><depth characteristic>" because a proper conjunction, such as "and" or "or", is not used between the terms. Appropriate correction is required.

2. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10, line 1 is indefinite with respect to "A system" as the system lacks proper antecedent basis. Appropriate correction, such as changing "A system" to "A method", is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1-3 and 5-12 are rejected under 35 U.S.C. 102(a) as being anticipated by Yokoi, U.S. Patent No. 5,682,171.

With regard to claim 1, Yokoi describes defining a depth characteristic for each object or layer, and respectively displacing each object or layer by a determined amount in a lateral direction as a function of the depth characteristic of each layer (col. 2, lines 20-63; col. 3, lines 29-41; and col. 7, line 64 to col. 8, line 10).

With regard to claim 2, Yokoi describes at least one said layer having a plurality of said objects is segmented into additional layers (col. 3, lines 5-20).

With regard to claim 3, Yokoi describes an additional layer is created for each said object (Fig. 10 and col. 10, lines 48-64).

With regard to claim 5, Yokoi describes a tag associated with each said object includes the depth characteristics for said object (Fig. 17 and col. 14, lines 4-16).

With regard to claims 6, 7, and 10, Yokoi describes each object and layer is assigned an identifier and/or a depth characteristic, as recited in claim 6

Art Unit: 2671

(object identifier OBJ at, for example, col. 7, line 64 to col. 8, line 10; layer identifiers BG and W0-W31 at, for example, Fig. 10 and col. 10, lines 48-64; depth characteristic JP in col. 12, lines 46-54 and depth characteristic GP in col. 14, lines 4-16); object identification may be defined as <layer identifier> <object identifier> <depth characteristic>, as recited in claim 7 (object identifier OBJ at, for example, col. 7, line 64 to col. 8, line 10; layer identifiers BG and W0-W31 at, for example, Fig. 10 and col. 10, lines 48-64; depth characteristic JP in col. 12, lines 46-54 and depth characteristic GP in col. 14, lines 4-16); and depth characteristics for each said object or layer is embedded in said layered source, as recited in claim 10 (Figs. 15 and 17, depth characteristics JP and GP, respectively, and Fig. 8, layered source Image Work Memory 255; col. 12, lines 56-64; col. 13, lines 28 to col. 14, line 16).

With regard to claim 8, Yokoi describes wherein each identifier is an alphanumeric identifier (layer identifiers W0-W31 in Fig. 10 and col. 10, lines 48-64; object identifiers SPT0-SPT3 in Fig 14 and col. 12, lines 25-45).

With regard to claim 9, Yokoi describes said layer identifier is a reference to said depth characteristic (col. 13, lines 53-66).

With regard to claim 11, Yokoi describes duplicating each said layer to create said left and right eye images; defining a depth characteristic for each object or layer, and respectively displacing each object or layer by a determined amount in a lateral direction as a function of the depth characteristic of each layer (col. 2, lines 44-63).

With regard to claim 12, Yokoi describes said displacing of said left and

right eye images is in an equal and opposite direction (col. 2, line 64 to col. 3, line 4).

4. Claims 1 and 4 are rejected under 35 U.S.C. 102(a) as being anticipated by Richard, International Publication No. WO 97/24000.

With regard to claim 1, Richard describes defining a depth characteristic for each object or layer, and respectively displacing each object or layer by a determined amount in a lateral direction as a function of the depth characteristic of each layer (see Abstract).

With regard to claim 4, Richard describes wherein at least one said object is stretched to enhance the stereoscopic image (page 12, line 10 to page 13, line 6).
